### Ax-It Basal Oil

See Elite Basal Oil, #490086

### Barricade 65 WDG

See Cavalcade, #490034

### Barrier (dichlobenil)

**#490064**

Selective herbicide for control of annual and perennial grasses and weeds in non-crop areas: landscape ornamentals not grown for commercial sale, parks, along roads & highways, around buildings, hedges, trees, sports grounds, and along fences.

**Rate:** 100 - 200 lb/ acre; 2.3 - 4.6 lb/ 1,000 sq ft  
**Size:** 50 lb bag

### Bensumec 4 LF (bensulide)

**#490032**

Selective herbicide for pre-emergent control of crabgrass and annual bluegrass in turf, ornamentals, & groundcovers.

**Crabgrass:** 1-7/8 - 2.5 gal in 80 - 100 gal water/ acre; 5.6 - 7.3 fl oz/1,000 sq ft  
**Size:** 2 x 2.5 gal

### Cavalcade 65 WDG (prodiamine)

**#490034**

Pre-emergent. Provides residual control of grass and broadleaf weeds in established turfgrasses (excluding golf course putting greens), lawns, sod nurseries, in container field grown and landscape ornamentals; hardwood seedling nurseries, established perennial and wildflower plantings; plants grown for cut foliage production; Christmas tree farms.

**Rate:** See label  
**Size:** 5 x 10 lb case

### Certainty (sulfosulfuron)

**#490035**

Solves tough nutseed problems in golf course* fairways, roughs and tees; lawns; sod farm; cemeteries and any other highly managed commercial or residential turf.

*Note: Certainty Turf Herbicide is not labeled for golf course putting greens or within 4 ft of the putting green.

**Rate:** See label  
**Size:** 1.25 oz bottle

### Confront (triclopyr & clopyralid)

**#490040**

While Supplies Last  
Alternative, See Quali-Pro 2-D, #490030

### Dimension 2EW (dithiopyr)

Selectively formulated as an emulsifiable concentrate providing control of listed annual grasses & broadleaf weeds in established lawns, commercial sod farm, ornamental turf (including golf course fairways, roughs, tee boxes, putting greens) and landscape ornamentals.

**Rate:** 1.5 - 2 qts/ acre; 1.125 - 1.5 fl oz/ 1,000 sq ft

### Dithiopyr WSP

**#490025**

Same ai as Dimension  
Pre-emergent. Offers excellent control of many different annual weeds prior to germination. Also controls crabgrass as a post-emergent when applied shortly after germination.

**Rate:** 1.5 - 3 pkts/ acre  
**Size:** 8 x (4 x 50 oz pkts)

### Drive XLR 8 (quinclorac)

**#490061**

Proprietary, water-based formulation, Drive XLR8 improves the control of crabgrass and is rain-fast in less than 1 hour!

**Rate:** 64 oz/ acre; 1.45 oz/ 1,000 sq ft  
**Size:** 4 x 1/2 gal

### Dyclomec 4G:

See Barrier, #490064

### Eject 75 (quinclorac)

**#490063**

Post-emergence, residential & non-residential turfgrasses for extended control of many broadleaf and grass weeds.

**Rate:** 1 lb/ acre (0.37 oz/ 1,000 sq ft) Do not apply more than 2 lb/ acre (.74 oz/ 1,000 sq ft)/ year  
**Size:** 6 x 1 lb  
Use Microyl Surfactant

### Elite Basal Oil

Basal Oil is a surfactant used with herbicides, also includes Blue Dye Indicator

## HERBICIDES

**Fiesta Bio-herbicide (Iron Hedta)**  
Mineral based herbicide, perfect for spot treatment of broadleaf weeds in lawns, turf, parks, playgrounds cemeteries & athletic fields. Reseed turf after 24 hours!  
**Rate:** 5. oz/ gal of water, 5 - 10 gal of finished mix/ 1,000  
**Size:** 2 x 2.5 gal  
#490163  
#490169

**Finale (glufosinate-ammonium)** #490092  
Non-selective water-soluble herbicide for application as a foliar spray for the control of a broad spectrum of emerged annual & perennial grass and broadleaf weeds. Will also control certain woody species, **Rate:** 1.5 - 4 fl oz/ gal water,  
**Size:** 2 x 2.5 gal

**FreeHand (dimethenamid, pendimethalin)** #490258  
New ai for use in landscape ornamentals, imethena-mid-P combined with pendimethalin. A perfect tool for pre-emergent weed control of annual grasses, susceptible sedge species and many small-seed broadleaf weeds. **Rate:** 100 - 200 lbs/ acre  
**Size:** 50 lb bag

**Gallery 75 df (isoxaben)** #490074  
Selective pre-emergent, controls certain broadleaf weeds, and annual grasses in established turf, landscape ornamentals, nursery stock, and non-cropland areas. **Controls such weeds as:** chickweed - white clover - prostrate knotweed - oxalis - spurge - common purslane - crabgrass - dandelion & foxtails  
**Rate:** 66 - 1.33 lb/ acre or .25-.50 oz/ 1,000 sq ft  
**Size:** 4 x 1 gal

**Isoxaben** #490075  
Selective pre-emergent for control of certain broadleaf weeds, annual grasses in established turf, landscape ornamentals, nursery stock, and non-cropland areas. **Controls such weeds as:** chickweed - white clover - prostrate knotweed - oxalis - spurge - common purslane - crabgrass - dandelion & foxtails  
**Apply in late summer to early fall or in early spring prior to germination for target weeds. Rate:** .66 - 1.33 lb/ acre or .25 -.50 oz/ 1,000 sq ft

**Finale** #490092

**Manage**  
See SedgeHammer, #490210

**Meccomec 4 (MCPP)** #490104  
For control of surface creeping or prostrate broadleaf weeds in golf greens, fairways and other fine turfgrass. **Rate:** See label for rates,  
**Size:** 2 x 2.5 gal

**Millennium Ultra 2**  
See Trimec Classic, #490155, or Speedzone, #490223

**Onetime** #227015  
Quinclorac, mecoprop, dicamba  
Post-emergence herbicide provides control of nearly 70 weeds including crabgrass, broadleaf, foxtail, torpedograss, wild violet, dollarweed and ground ivy. Combines the latest Drive XLR 8 herbicide technology with MCPP-P and dicamba to deliver unsurpassed control. **Rate:** 64 oz/ acre, or 1.45 oz/ 1,000 sq ft

**Oryzalin 4 Pro**  
Post-patent Surflan (oryzalin) #490140  
**Prices Subject to Change Without Notice**
**Herbicides**

**Oxadiazon 2G (Ronstar) #490150**
A selective pre-emergent for control of many annual grasses and broadleaf weeds in turf, woody ornamental shrubs, vines, and trees. Do not use on bentgrass or turf containing red fescue or annual flower beds. **Turf:** 100 - 200 lbs/acre or 2.25 - 4.5 lbs/1,000 sq ft, **Woody Ornamentals:** 100 - 200 lbs/acre, or 2.25 - 4.5 lb/1,000 sq ft **Size:** 50 lb bag

**Pendulum AquaCap #490122**
(Pendimethalin)
Pendulum AquaCap delivers virtually no odor, reduced staining potential, increased ease and flexibility of handling, mixing and cleanup, and improved storage stability and environmental profile. Will not control established weeds. **Rate:** See label, **Size:** 2 x 2.5 gal

**Pennant MAGNUM #490196**
(S-metolachlor)
Pre-emergence herbicide that offers long-lasting residual control of yellow nutsedge and tough annual grass and broadleaf weeds. Can be used in wide range of ornamentals and warm season turfgrasses. MAGNUM technology provides superior control of labeled weeds at a 33% reduction in use rate. **Rate:** 1.3 - 2.6 pts/acre, **Size:** 4 x 1 gal

**PowerZone (4-way)**
Excellent post-emergent activity with proven performance for broadleaf weed control in turfgrass. Provides rapid and effective weed control for common and troublesome weed species in turfgrass, including white clover, dandelion, ground ivy and spurge. **Rate:** 2.0 - 6.0 pts/acre; general 3.5 - 4.0 pts (Lower rates can be used in cooler weather conditions) **See label for specific species rate recommendations.**

**Pramitol 25E (prometon) #077074 #077247**
An emulsifiable non-selective herbicide that controls a wide variety of annual and perennial broadleaf weeds and grasses in non-cropland areas. Apply prior to weed emergence to the time weeds are 3 months old. Residual action lasts for a year or more. Do not use in areas that will be planted within a year. Do not apply near desirable plants. **Rate:** 20 - 30 gal/acre in 50 - 100 gal water

---

**HERBICIDES**

**ProDeuce**
Pre-emergent and post-emergent non-selective weed control for many broadleaf weeds and grasses. **Rate:** 3 - 6 oz/ gal water, treats 1,000 sq ft

- **Size:** 4 X 1 gal  #490002
- **Size:** 2 X 2.5 gal  #490003

**Prodiamine 65 WDG (Cavalcade) #490354**
Pre-emergence, provides residual control of grass and broadleaf weeds in established turfgrasses (excluding golf course putting greens), lawns, sod nurseries, in container, field grown and landscape ornamentals; hardwood seedling nurseries, established perennial and wildflower plantings; plants grown for cut foliage production; Christmas tree farms. **Rate:** 1 lb/ acre, or .4 oz/ 1,000 sq ft, **Size:** 6 x 5lb jug

**Pronto (Imazapyr, glyphosate)**
Non-selective herbicide for season long control of undesirable vegetation in non-cropland areas. Do not use on lawns or around roots of desirable shrubs and trees. **Rate:** .75 - 1 qt/ gal water/ 100 sq ft

- **Size:** 4 X 1 gal  #490174
- **Size:** 2 X 2.5 gal  #490175

**Q 4 Plus**
Contains four (4) active ingredients: Quinclorac + Sulfentrazone + 2,4-D + Dicamba
Absorbed by both the leaves & roots and translocated throughout the plant. Offers the professional turf manager more knockout power!

- **#227018, Size:** 12 x 1 qt
- **#227016, Size:** 4 x 1 gal
- **#227017, Size:** 2 x 2.5 gal

**Quali-Pro 2-D #490030**
Same ai as “Confront” (triclopyr, clopyralid)
Broad spectrum herbicide, this low odor post-emergence provides superior control of up to 35 “difficult-to-manage” species of broadleaf weeds. **Rate:** 1 - 2 pints/ acre; .37 - .74 fl oz/ 1,000 sq ft. **Size:** 4 x 1 gal

**Quali-Pro T/I 2.5 G #490129**
Same ai as “Snapshot” (trifluralin + isoxaben)
Broad-spectrum pre-emergence herbicide used in Christmas Tree plantations. non-bearing fruit & nut trees, non-bearing vineyards, non-crop & ornamentals. Controls broadleaf weeds & annual grasses. **Rate:** 100 - 200 lbs/ acre, or 2.3 - 4.6 lbs/ 1,000 sq ft, **Size:** 50 lb

**ReGreen Turf Color #434375**
Non-phytotoxic colorant specifically formulated to impart a long lasting, natural ryegrass color when applied to dormant and non-dormant turfgrasses. Easy to blend treated areas into existing turf, no tank mixing to achieve proper color. **Rate:** 8 oz/ gal water/ 1,000 sq ft, **Size:** 2 x 2.5 gal

**Replace Divot Mix Colorant #434374**
A permanent colorant specifically formulated to impart a long-lasting green color to sand during the mixing phase of divot mix preparation. Natural green color blends easily with turf, won’t harm germination of sensitive turfgrass seed, economical. **Rate:** Premix 6 oz of REPLACE with 6 oz water/ 100 lbs sand, **Size:** 2 x 2.5 gal

**Ronstar:**
See Oxadiazon 2G, #490150

**RoundUp ProMax (glyphosate)**
Systemic post-emergence glyphosate, provides broad spectrum control of many annual & perennial weeds, woody brush and trees. This formulation is the most concentrated Roundup Pro® ever! A unique surfactant allows penetration of leaf surfaces faster than other glyphosate herbicide products giving it a 30-minute rain-fast warranty. **Rate:** 2 - 4 qt/ acre or 2 - 3 fl oz/ 1,000 sq ft

- **Size:** 1.67 gal  #490330
- **Size:** 30 gal  #490320

**RoundUp PROConcentrate #490303**
(51% glyphosate)
Labeled for nurseries and roadside only. Same great RoundUp formula with 51% a.i., **Size:** 2 x 2.5 gal

Less to Use/Costs Less to Spray!

**HERBICIDES**

**RoundUp Quik Pro Dry**

- **#490208**
- (glyphosate)
- Pre-measured packets, in a dry formulation. Easy to use:
  - No mixing - No spilling - Non-selective, **Rate:** 1 pkt/ gal of water
  - **Size:** 6 x 5 1.5 oz pkts (sold by pack of 5)

**RoundUp WDG QuikPro**

- **#490214**
- (glyphosate)
- QuikPRO’s fast symptomology, quick burn-down and complete control reduce weed control complaints and callbacks.
  - The latest herbicide invention visible results in 24 hrs, rain-fast in 1 hr
  - **Rate:** 1 1/2 oz/ gal of water
  - **Size:** 6.8 lb jug

**Sahara DG**

- **#490333**
- (imazapyr & diuron)
- Controls over 150 weeds, and most common turf grasses, in a single application. Offers effective pre and post-emergent control and a wide application window to meet your schedule. Because Sahara stays where it’s applied and affects only targeted vegetation, there’s little chance of off target damage.
  - **Rate:** 6 oz/1,000 sq ft
  - **Size:** 4x10 lb

**Segment**

- **#490240**
- (Sethoxydim)
- Delivers selective post-emergent control of weed problems in centipedegrass, annual bluegrass, fine and tall fescue (established) and can be used on any non-grass plant species without issue, The Only Post-emergent grass herbicide that can be applied directly to trees.
  - **Rate:** See label for rates
  - **Size:** 4 x 1 gal

**Scythe**

- **#490128**
- (pelargonic acid & related fatty acids)
- Contact, non-selective, broad spectrum, foliar-applied herbicide. Provides control or burndown both annual and perennial broadleaf and grass weeds, as well as most mosses and other cryptogams.
  - **Rate:** See label for rates
  - **Size:** 2 x 2.5 gal

**SedgeHammer**

- For post-emergence control of purple or yellow nutsedge found in established turfgrass. DO NOT exceed the recommended amount of surfactant due to the potential for turf injury at higher rates.
  - **Rate:** 2/3 - 1/3 oz/ acre after nutsedge has reached the 3-8 leaf stage of growth.
  - **Size:** 10 x 1.33 oz
- **#490210**
  - **Size:** 30 x .9 grams
- **#490212**

HERBICIDES

Surge  (3-way; sulfentrazone)  #490242
Amine option for FAST weed control in warmer weather. Provides outstanding control of spurge and other warm-weather weeds such as knotweed, plantain, oxalis, clover and dandelion. Additionally, SURGE provides suppression of young and actively growing yellow nutsedge.  Rate:  See label  
Size:  4 x 1 gal  #490242  
Size:  2 x 2.5 gal  #490230

Tahoe 3A  #490183
Triclopyr 3A (Butoxyethyl triclopyr)  
Post-emergence control for brush and weed control on right-of-ways, industrial sites, non-crop areas, non-irrigation ditch banks, forests, and wildlife areas. A surfactant is recommended – such as basal oil.  Rate:  See label for rates  
Size:  2 x 2.5 gal

Tahoe 4E  #490183
Relegate Triclopyr 4E (Butoxyethyl triclopyr)  
Effectively controls woody plants & broadleaf weeds. Labeled for basal bark, cut stump & dormant stem applications and the ones listed above at Tahoe 3A. Oil soluble 4-lb ester formula. Easily penetrates waxy leaves on hard to control species, selective control does not disturb grasses.  Rate:  See label for rates  
Size:  2 x 2.5 gal

Team 2G (benifin & trifluralin)  #490146
Selective pre-emergence herbicide for control of crabgrass and other annual weed grasses in established turf including bentgrass fairways. Apply approximately 1 - 2 wks prior to germination of target grass weeds. Reseeding should be delayed for at least 6 weeks following application, 12 - 16 weeks if highest rate used.  Rate:  75-100 lb/ acre or 1.75-2.25 lb/ 1,000 sq ft  
Size:  40 lb bag

Tordon RTU  (picloram, dichlorophenoxyacetic acid)  #490147
Specially herbicide effectively kills cut stumps when you are cleaning out fence lines and non-cropland areas. RTU stands for Ready-to-Use, no mixing or measuring, you can use it nearly year-round. Just pour it into the convenient squirt bottle applicator and go to work!  
Size:  12 x 1 quart

Treflan 5G (trifluralin)  #490144
Pre-emergent control of annual grasses and broadleaf weeds in established flowers, ornamental groundcovers, woody shrubs, trees, and nursery stock.  Rate:  80 lb/ acre or 2 lb/ 1,000 sq ft  
Size:  40 lb bag

Triamine Jet-Spray  #490149
Spot Weed Killer (3-way)  
2,4-D, Mecoprop and Dicloprop amine formulation in a convenient premixed formula in an aerosol can. The foam marker shows treated areas. Excellent for quick spot treatment applications.  Size:  23 oz can

Trimec 992 (3-way)  
Broadleaf herbicide has long been favored by LCOs because it gives very rapid knockdown of dandelions while also offering a broad-spectrum of control. Wide range of water volumes accommodates tank-mixing needs, including fertilizers and lawn insecticides. Low volume rates are included,  Rate:  3 - 4 pt/ acre  

Size:  2 x 2.5 gal  #490126  
Size:  30 gal drum  #490157  
Size:  55 gal drum  #490131  
Size:  275 gal tote  #490161

Trimec Bent Formulation (3-way)  
Formulation of 2, 4-D, MCPP, and Dicamba for control of most broadleaf weeds in bentgrass.  Rate:  3 - 4 pt/ acre or 1 - 1/2 oz/ 1,000 sq ft  

Size:  4 x 1 gal  #490159  
Size:  2 x 2.5 gal  #490160

Trimec Classic Broadleaf (3-way)  
Selective post-emergent herbicide for control of broadleaf weeds such as chickweed, clover, dandelion, knotweed, spurge, and plantains in established turf. Do not apply when air temperature exceeds 85°F. Do not apply to newly seeded grasses until well established. Seeding can be done within 3 to 4 weeks following application,  Rate:  3.25 - 4 pt in 20-260 gal water/ acre or 1.2 - 1.5 fl oz in 1 - 6 gal water/ 1,000 sq ft  

Size:  4 x 1 gal  #490155

Post-emergent herbicide for knotweed, plantain and other broadleaf weeds in established turf. Can be applied in cool weather any time the temperature is above 40 deg. F and weeds are actively growing. Do not apply when air temperature exceeds 85 deg. F. Do not apply to newly seeded grasses until they are well established. Seeding can be done within 3 - 4 weeks after application., Rate: 2 - 3 pt in 20 - 260 gal water/ acre or .75 - 1.1 oz in 1 - 6 gal water/ 1,000 sq ft

Size: 4 x 1 gal # 490170
Size: 2 x 2.5 gal # 490172

Tupersan (siduron)  #490184
Can be used when seeding, sodding and sprigging for selective pre-emergent control of certain annual weed grasses. Labeled for use on sod farms, Rate: 4 - 12 lbs/ acre; 1.5 - 9 oz/ 1,000 sq ft, Size: 12 x 4 lb bag

Vegemec
See Pronto, #490174, 490175

Weed Mat
Use under shrubs and trees for a “Finished Landscape Look” for edging and boarders. Dense enough to block the light that many weed seeds need to germinate. Made of durable landscape fabric for use under mulch or to suppress weeds, retains moisture in soil. Rate: .75 - 1 qt/ gal water/ 100 sq ft.

Size: 4’ x 200’ # 434552
Size: 6’ x 200’ #434554
Size: 8’ x 200’ #434562

Contact Your Certified Turf Specialist Today!

There is an industry benchmark for professionalism that you can count on! A way to separate a mere vendor from a valued business partner, and a salesperson from a true resource. This mark of excellence is called the Certified Turf Specialist, or CTS Designation, a trademark of true professionalism.

CTS Requirements
1. All CTS testing Guidelines and Procedures are accredited by respected turf experts, recognized throughout the industry for their extensive knowledge of turf biology and agronomics.

2. Approved by Tom Voigt and Roscoe Randall of the University of Illinois, CTS Testing is offered exclusively through and created for the FS System, a leading supply organization for over 75 years.

3. The Certified Turf Specialist Designation requires the ability to demonstrate comprehensive biological and agronomic understanding of turf varieties, maintenance needs, & all aspects of turf performance.

To maintain certification, Certified Turf Specialists are required to complete scheduled testing and attend annual industry trainings on the latest turf and landscape products & maintenance methods.
